NEW CENTRIFUGES PROJECT

NEYA

PASSION

changes

everything

NEYA

Derived from the Hindi word “**NAYA**”, that means “new”, “novelty”, “innovation”, “**NEYA**” is the name given to the new generation of centrifuges developed in synergy by **REMI** and **GIORGIO BORMAC**.

The big experience of a historical manufacturer as **REMI**, combined to the Italian style and design of **GIORGIO BORMAC**, make a perfect combination in developing products with performance and characteristics suitable to all the operational requests.

It is with these premises that we are pleased to present the new project “**NEYA**”!

NEYA...a new concept... a new project... a new generation!

New rotors and accessories

FIRST LETTER

- A**= Fixed angle rotor
- S**= Swing out rotor
- B**= Bucket
- SB**= Swing out rotor + Buckets (KIT)
- L**= Lid of bucket
- I**= Insert for bucket
- C**= Cushion
- RE**= Reductor
- T**= Tube
- PCR**= PCR rotor
- HE**= Hematocrit rotor

MIDDLE NUMBERS*

- 1° NUMBER**= maximum number of tubes
- 2° NUMBER**= capacity of tubes (ml)

LAST LETTER

- F**= Falcon® tube included or suitable for conical bottom tube
- P**= Plastic round bottom tube included
- G**= Glass round bottom tube included
- R**= Suitable for round bottom tube
- X**= Extra metal bucket (long version)

** Only for reductors (RE), the middle numbers identify the capacity reduction (ml)
In case of only one middle number, it represents the capacity (ml)
For PCR and hematocrit rotors, the middle numbers represent
respectively number of PCR strips, number of capillaries and their length (mm)*

A 32-15

Fixed angle rotor for 32 tubes 15 ml

S 4-175

Swing out rotor for 4 buckets 175 ml

B 16-5/7

Aluminum carrier for 16 tubes 5/7 ml

SB 4-175

*Kit composed by swing out rotor S 4-175
and 4 buckets B 175 of 175 ml*

I 4-15R

Insert for 4 round bottom tubes 15 ml

RE 50-15F

Reductor from 50 ml to 15 ml conical bottom

B 50XF

*Metal bucket 50 ml extra version
with 50 ml Falcon® tube included*

maximum capacity 4 x 175 ml
maximum speed 6.000 rpm

NEYA 8

Basic

- **Automatic rotor detection, check of presence of accessories and compatibility with maximum speed**
- **Safety speed limiter function**
- Controlled by microprocessor
- Backlit color LCD display with contemporary visualization of all parameters
- Digital adjustment of acceleration and deceleration levels
- Compact sizes to optimize the space in laboratory
- Stainless steel internal bowl with optimal height for load and download of samples
- Imbalance detection system with automatic functioning stop to avoid accidents
- Automatic locking system of the lid
- Safety opening of the lid in case of absence of electric power
- Brushless motor maintenance free and no deposits
- Construction in accordance with European directives

Standby

Features	NEYA 8
Maximum capacity	4 x 175 ml (swing out) - 6 x 100 ml (fixed angle)
Maximum speed	4.500 rpm (swing out) - 6.000 rpm (fixed angle)
Setting RPM	Yes
Setting RCF	-
Display RCF	-
Timer	00:30 ÷ 99:50 (mm:ss) and continuous mode
Date and Time	-
Acceleration levels	L-M-H (Low - Medium - High)
Deceleration levels	L-M-H (Low - Medium - High)
Spin function	-
Programs	-
Indication of rotor	Yes
Noise	55 dB
Directive / Standard	IEC 1010-1 ; IEC 1010-2-020
External dimensions WxDxH/Weight	450 x 590 x 330 mm / 40 Kg
Height of access to the chamber	275 mm
Voltage / Power	220 ±10% V 50 Hz / 450 W
Part number	40100302

Furniture support with turning wheels.
Part number 40101802

Optimal height for load and download of samples

maximum capacity 4 x 175 ml
maximum speed 6.000 rpm

NEYA 10

Professional

NEYA 10R

Professional Refrigerated

- Automatic rotor detection, check of presence of accessories and compatibility with maximum speed
- Safety speed limiter function
- 10 storable programs with protection function
- Setting of speed in RPM and RCF
- Short Spin function and precool (NEYA 10R)
- Temperature range from -10°C to +40°C (NEYA 10R)
- Controlled by microprocessor and backlit color LCD display with contemporary visualization of all parameters
- Digital adjustment of acceleration and deceleration levels
- Stainless steel internal bowl with optimal height for load and download of samples
- Imbalance detection system with automatic functioning stop to avoid accidents
- Automatic locking system of the lid, safety opening of the lid in case of absence of electric power
- Brushless motor maintenance free and no deposits

Ventilated centrifuge NEYA 16

High speed rotor for NEYA 16 and 16R

Swing out rotors

4

I 4-15F

Set of 4 pieces
P/N 40100632

For conical
bottom tubes as
Falcon®

Max tubes for
insert 4

Max tubes
for rotor 16

Capacity 15 ml
Ø max. 16,5 mm
H max. 120 mm

3

I 7-10

Set of 4 pieces
P/N 40100622

For collection
tubes
Vacutainer®

Max tubes for
insert 7

Max tubes
for rotor 28

Capacity 10 ml
Ø max. 16 mm
H max. 114 mm

2

I 7-5/7

Set of 4 pieces
P/N 40100612

For collection
tubes
Vacutainer®

Max tubes for
insert 7

Max tubes
for rotor 28

Capacity 5-7 ml
Ø max. 13 mm
H max. 116 mm

1

I 12-2

Set of 4 pieces
P/N 40100602

For microtubes
Eppendorf®

Max tubes for
insert 12

Max tubes
for rotor 48

Capacity 1,5-2 ml
Ø max. 10,6 mm
H max. 42 mm

SB 4-175

Kit composed by swing out rotor
S 4-175, 4 buckets **B 175** and 4 Biosafe
lids **L 175**

Maximum capacity	4x175 ml
Maximum speed	4.500 rpm
Maximum acceleration	3.600 xg
Part number	40100502

S 6-96 MP

Swing out rotor
for microplates

Max plates for tray 3
Max plates for rotor 6

Max speed: 3.200 rpm
Max acceleration: 1.950 xg

Part number: 40100522

*Supplied complete
with 2 trays*

S 4-175

Swing out rotor
for aluminum carriers

Max speed: 4.500 rpm
Max acceleration: 3.600 xg

Codice: 40101502

5

I 4-15R

Set of 4 pieces
P/N 40100642

For round bottom tubes

Max tubes for insert 4

Max tubes for rotor 16

Capacity 15 ml
Ø max. 17 mm
H max. 110 mm

6

I 1-50F

Set of 4 pieces
P/N 40100652

For conical bottom tubes as Falcon®

Max tubes for insert 1

Max tubes for rotor 4

Capacity 50 ml
Ø max. 29 mm
H max. 116 mm

7

I 1-50

Set of 4 pieces
P/N 40100662

For round bottom tubes

Max tubes for insert 1

Max tubes for rotor 4

Capacity 50 ml
Ø max. 30 mm
H max. 110 mm

8

I 1-100

Set of 4 pieces
P/N 40100672

For round bottom tubes

Max tubes for insert 1

Max tubes for rotor 4

Capacity 100 ml
Ø max. 45,5 mm
H max. 102 mm

Direct insertion of bottles

It is possible insert flat bottom plastic bottles with 175 ml capacity without reducers

T 175 Flat bottom plastic bottle 175 ml with lid

Fixed angle rotor 45°

For Eppendorf® tubes 5 ml

n. tubes for rotor 12

Supplied with Biosafe lid

Max speed: 14.000 rpm

Max acceleration: 20.380 xg

Part number: 40100832

A 24-2

Fixed angle rotor 45°

For Eppendorf® tubes 1,5/2,0 ml

n. tubes for rotor 24

Supplied with Biosafe lid

Max speed: 15.000 rpm

Max acceleration: 21.000 xg

Part number: 40100842

PCR 4-8

Fixed angle rotor 45°

For PCR strips of 8 tubes

n. strips for rotor 4

Supplied with Biosafe lid

Max speed: 15.000 rpm

Max acceleration: 21.000 xg

Part number: 40100872

RE 2-05

Reductor for microtubes of 0,5 ml for rotor A 24-2.

Set of 24 pieces.

Part number: 40101262

RE 2-02

Reductor for microtubes of 0,2 ml for rotor A 24-2.

Set of 24 pieces.

Part number: 40101272

RE 05-02

Reductor for microtubes of 0,2 ml for rotor A 36-05.

Set of 36 pieces.

Part number: 40101282

A 36-05

Fixed angle rotor 37°

For Eppendorf® tubes 0,5 ml

n. tubes for rotor 36

Supplied with Biosafe lid

Max speed: 15.000 rpm

Max acceleration: 21.000 xg

Part number: 40100852

HE 24-75

Fixed angle rotor 90°

For hematocrit capillaries 75 x 1mm

n. capillaries for rotor 24

Supplied with Biosafe lid

and reading device

Max speed: 12.000 rpm

Max acceleration: 15.300 xg

Part number: 40100882

Selection guide for centrifuge and rotor

In the following pages useful guides for choice of centrifuge, rotor and accessories suitable for different applications are provided.

In the various table-guide, icons and symbols are used to simplify their reading.

For the right comprehension it is necessary verify the performance of individual accessories.

Centrifuging

Centrifuges are instruments used in many laboratories to separate particles in liquid solutions or liquids with different density, applying them an artificial centrifugal force.

Use of centrifuges permits developing of a much higher force than gravity earth force, thus accelerating separation and sedimentation process.

Swing out rotors (with variable angle)

During centrifugation the tubes go in perpendicular position than axis of rotor. As a consequence the sedimentation distance and time are greater, but separation borders are perpendicular to the tube and more net.

The swing out rotors are generally used to centrifuge big quantity of sample with medium speed.

Angular rotors (with fixed angle)

The oblique angle of tubes reduces sedimentation distance, thus reducing the necessary time for separation, but borders are inclined respect the tube and less net. The fixed angle rotors are generally used to centrifuge minor quantity of sample with high speed.

The simplified formula to calculate RCF is:

$$RCF = (n/1000)^2 \times r \times 11,18$$

n = speed (rpm) and **r** = radius in cm

Calculation of centrifugal force

Generally the performance of centrifuge are specified in function of the maximum achievable speed. However the speed represents only approximately the real force developed into the sample that generates the separation.

This force is expressed like relative centrifugation force (RCF). Its value indicates how many times the centrifugation force exceeds the natural gravity acceleration "g".

Observing the lateral formula it is clear that RCF is directly proportional to the axis of rotor and linked to the square of speed. It means that, for example doubling radius, RCF doubles and it quadruples with doubling of speed.

As a consequence the performance of centrifuges should be compared only on RCF values.
